Clinical research trials

1. Ciprofloxacin in the treatment of pediatric patients with complicated urinary tract infections or pyelonephritis. Prospective, randomized, multi-center study (Bayer corporation). **Principal investigator.** 2000
2. Incidence of viral epididymitis in children. Prospective study. **Principal Investigator.** Grant from Cincinnati Kidney Foundation, (\$ 9,000). 2000)
3. Normal reference ranges for urinary supersaturation indices in the pediatric population. Prospective study. Protocol CHMC#01-7-26X. **Principal Investigator.** Grant from Litholink Laboratory inc. 2000
4. Tolterodine liquid in children with detrusor hyperreflexia (1 month to 4 years of age). Prospective, multi-center study 583-URO-0581-001 (Pharmacia corporation). **Principal investigator.** 2001
5. Tolterodine liquid in children with detrusor hyperreflexia (5 years to 10 years of age). Prospective, multi-center study 583-URO-0581-002 (Pharmacia corporation). **Principal investigator.** 2001
6. Tolterodine liquid in children with detrusor hyperreflexia (11 years to 15 years of age). Prospective, multi-center study 583-URO-0581-003 (Pharmacia corporation). **Principal investigator.** 2001
7. Long-term clinical efficacy, safety and tolerability of tolterodine oral solution and PR capsules in children with detrusor hyperreflexia (Ages 4 months to 16 years of age). 583-URO-0581-006 (Pharmacia corporation) **Principal investigator.** 2002
8. Ciprofloxacin in the treatment of pediatric patients with infectious diagnoses. Multi-center study 100201 (Bayer corporation). **Sub-investigator.** 2002
9. Urine crystal inhibition in pediatric nephrolithiasis. Multi-center study (Litholink corporation). **Sub-investigator.** 2005
10. Efficacy of gentamicin bladder irrigations in complex pediatric urologic patients. Cincinnati Kidney Foundation. **Sub-investigator.** 2006
11. An open, non-randomized, multi-center study in children with vesicoureteral reflux grade II-IV receiving endoscopic correction with Deflux^R 2010-1567 2010 (Oceana corporation) **Sub-investigator.** 2010 – ongoing
12. Randomized controlled trial of patient outcomes comparing low-friction hydrophilic catheters (LO-FRIC®) versus standard urethral catheters in children with neuropathic bladder on clean intermittent catheterization 2008-0701 2011 (Astra Tech corporation) **Sub-investigator.** 2011 – ongoing
