Rīga Stradiņš University

Quality Policy

Rīga Stradiņš University (RSU) implements an up-to-date quality improvement approach for ensuring high quality studies and research oriented towards continuous improvement and development of the university on the road towards excellence.

Quality policy is based on RSU strategy and values, namely, human, team, result and loyalty.

Quality policy is implemented by observing the following principles:

- **Student-Centred approach** – to involve students in the improvement of study process, foster equality of rights and mutual interaction between academic staff and students, encourage the use of interactive teaching methods by academic staff by simultaneously developing up-to-date study and research environment and infrastructure.

- **Partnership** – to foster interdisciplinarity by linking health care with social sciences, shape a unified student community by strengthening RSU traditions and values and operate in socially responsible and sustainable manner, develop and introduce innovations in cooperation with interested parties, as well as integrate best practices at RSU.

- **Quality** – to maintain and develop quality assurance system within the framework whereof all-encompassing and results-oriented quality improvement approach is implemented, ensure professional development of employees and foster employee involvement and responsibility for the improvement of the operation of the university.

Quality policy is implemented by all RSU structural units and employees by fulfilling its strategic goals at both the level of the structural unit and at individual level. A detailed description of activities oriented towards ensuring quality is provided in the Quality Manual.
