Preface	8
Detailed program / time schedule	15
Welcome plenary lecture	
00-01: Spectroscopy in plant-animal interactions: Looking at the natural world as a herbivore.....	20
<i>William J. Foley, Karen J. Marsh, Kara Youngentob</i>	
Session 1 - NIR Spectroscopy / Imaging (Co-chairs: Huck/Siesler)	
01-01: Hand-held vibrational spectrometers: State-of-the art instrumentation and novel applications.....	21
<i>Heinz W. Siesler</i>	
01-02: Recent advances in vibrational spectroscopic imaging studies of medicinal plants	22
<i>Christian W. Huck</i>	
01-03: Running a network of NIRS instruments for forages and other plant materials - Quality control	23
<i>Peter Tillmann</i>	
01-04 Application of NIR technology to predict minor components in raw and processed potatoes	24
<i>Inga Smit, Norbert U. Haase</i>	
01-05: Fluorescence ratiometry and NIR transmission in combination allow in-situ analysis of leaf apoplastic pH under controlled changes of leaf water content	26
<i>Helmut Kaiser, Karl Hermann Mühling</i>	
01-06: Contribution of infrared spectroscopy to evaluate the variability of quality traits of the fresh and processed apples	27
<i>Weijie Lan, Benoit Jaillais, Catherine Renard, Alexandre Leca, Sylvie Bureau</i>	
Session 2 - Hyperspectral Imaging (Co-chairs: Devaux/Vermaak)	
02-01: Hyperspectral imaging in combination with chemometric data analysis – a powerful duo in the quality control of herbal medicines.....	30
<i>Ilze Vermaak, Sidonie Yankam Tankeu, Majolie Djokam, Maxleene Sandasi, Weiyang Chen, Alvaro Viljoen</i>	
02-02: Multiscale and multimodal spectral Imaging for mapping cell wall polymers in plant organs.....	31
<i>Marie-Françoise Devaux, David Legland, Cécile Barron, Fabienne Guillon</i>	
02-03: Autofluorescence multispectral image analysis at the macroscopic scale for tracking wheat grain tissues: a novel approach for a more specific identification of wheat grain dietary fibre	33
<i>Marie-Françoise Devaux, Mathias Corcel, Fabienne Guillon, Luc Saulnier, Cécile Barron</i>	
02-04: Early detection of the grapevine disease Esca using hyperspectral sensors	34
<i>Nele Bendel, Anna Kicherer, Janine Köckerling, Andreas Backhaus, Hans-Christian Klück, Udo Seiffert, Ralf Voegele, Reinhard Töpfer</i>	

02-05: Detection of anomalies in bulk materials using hyperspectral imaging 35
Julius Krause, Jürgen Hock, Robin Gruna, Thomas Längle

02-06: Visual quality assessment of black cohosh using hyperspectral imaging and chemometrics 36
Sidonie Yankam Tankeu, Ilze Vermaak, Weiyang Chen, Maxleene Sandasi, Guy Paulin Kamatou, Alvaro Viljoen

Session 3 - Raman Spectroscopy / Imaging (Co-chairs: Baranska/Gierlinger)

03-01: Raman imaging of plant cells: where do we stand and where to go? 37
Batirtze Prats-Mateu, Martin Felhofer, Nannan Xiao, Peter Bock, Notburga Gierlinger

03-02: Raman spectroscopy combined with AFM reveals complexity of carotenoid samples 38
Malgorzata Baranska, Anna Rygula, Marta Z. Pacia, Monika Dudek, Ewa Machalska, Grzegorz Zajac, Agnieszka Kaczor, Tomasz Oleszkiewicz, Ewa Grzebelus, Rafal Baranski

03-03: In-capsule quantitation of EPA and DHA by handheld Raman spectroscopy: fish oils to algal oils 39
Daniel P. Killeen, Keith C. Gordon, Nigel B. Perry, Susan N. Marshall

03-04: Lignin – I see you! 40
Peter Bock, Paula Nousiainen, Thomas Elder, Antje Potthast and Notburga Gierlinger

03-05: Combined bioorthogonal labeling, Raman spectroscopy and fluorescence histochemistry provide detailed spatial information on lignification in plant cell walls 41
Clémence Simon, Cédric Lion, Fabien Baldacci-Cresp, Anne-Sophie Blervacq, Corentin Spriet, Myriam Moreau, Brigitte Huss, Ludovic Duponchel, Christophe Biot, Simon Hawkins

03-06: Chemical signature in xylem cell wall of *Salix glauca* L. due to *Eurois occulta* L. outbreaks 43
Angela Luisa Prendin, Marco Carrer, Nanna Bjerregaard Pedersen, Mario Pividori, Jørgen Hollesen, Signe Normand, Lisbeth Garbrecht Thygesen

03-07: Raman spectroscopy shows adaption of pollen composition in *Poa alpina* 44
Sabrina Diehn, Stephan Seifert, Boris Zimmermann, Murat Bağcioğlu, Achim Kohler, Mikael Ohlson, Siri Fjellheim, Steffen Weidner, Janina Kneipp

Session 4 - FTIR Spectroscopy / Imaging (Co-chairs: Krähmer/Schulz)

04-01: Plant roots and FTIR – analyzing species composition and root biomass in peat soil 45
Petra Straková, Tuula Larmola, Raija Laiho

04-02: Vibrational spectroscopy of pollen as a tool for reconstructing solar-ultraviolet irradiance 47
Boris Zimmermann, Alistair W. R. Seddon, Florian Muthreich, Murat Bağcioğlu, Achim Kohler, Daniela Festi, Valeria Tatintseva, Mikael Ohlson

04-03: MD Dating – Dating of wood based on its molecular decay (MD) measured using FTIR spectroscopy 49
Johannes Tintner, Bernhard Spangl, Franziska Reiter, Ena Smidt, Michael Grabner

04-04: Quantitative FTIR imaging displays the sucrose landscape within and along its allocation pathway 50
André Guendel, Hardy Rolletschek, Steffen Wagner, Aleksandra Muszynska, Ljudmilla Borisjuk

04-05: ATR-FTIR imaging reveals cell wall layer-specific chemotypes in poplar tension wood.....	51
<i>Clément Cuello, Paul Marchand, Françoise Laurans, Camille Grand-Perret, Véronique Lainé-Prade, Gilles Pilate, Annabelle Déjardin</i>	
04-06: Nano-FTIR spectroscopy of in situ and extracted silica phytoliths.....	53
<i>Victor Manuel R. Zancajo, Max Eisele, Rivka Elbaum, Janina Kneipp</i>	
04-07: Understanding the formation of highly durable heartwood in larch by use of Synchrotron infrared imaging and multivariate resolution techniques.....	54
<i>Sara Piqueras Solsona, Sophie Füchtner, Rodrigo Rocha de Oliveira, Adrián Gómez Sánchez, Tobias Keplinger, Anna de Juan, Lisbeth Garbrecht Thygesen</i>	

Session 5 - Chemometrics and Remote sensing (Co-chairs: Beleites/Gorzsás)

05-01: Multivariate analytical strategies for spectral data of plants	56
<i>Andras Gorzsás</i>	
05-02: Experimental design considerations for developing spectroscopic calibration models of plant material	57
<i>Claudia Beleites</i>	
05-03: Measurement uncertainty for NIRS measurements	58
<i>Peter Tillmann</i>	
05-04: Identification and quantification of heartwood extractives of Norway spruce (<i>Picea abies</i>) and hybrid larch (<i>Larix gmelinii</i> × <i>japonica</i>) clones using GC-MS and MCR-ALS	59
<i>Sophie Füchtner, Theis Brock-Nannestad, Sara Piqueras Solsona, Stefan Willför, Lisbeth Garbrecht Thygesen</i>	
05-05: Establishment of a field spectral library of agricultural crops in Germany for monitoring biophysical parameters at different spatial scales	60
<i>Heike Gerighausen, Holger Lilienthal</i>	
05-06: Forest regeneration after fire in semi arid land in the north west of Algeria analysis with remote sensing data	62
<i>Ahmed Zegrar, Nadja Bentekhici</i>	

Session 6 - GC-/LC-MS profiling (Co-chairs: Robbat/Fiehn)

06-01: MassBank of North America: using untargeted metabolomics and multistage fragmentation mass spectral libraries to annotate natural products in plants.....	63
<i>Arpana Vaniya, Sajjan Mehta, Gert Wohlgemuth, Oliver Fiehn</i>	
06-02: Climate effects: changes in the tea metabolome	64
<i>Nicole Kfouri, Albert Robbat</i>	
06-03: Metabolomics as tool to improve food quality.....	66
<i>Roland Mumm, Ric C.H. de Vos, Robert D. Hall</i>	
06-04: Oxylipidomics – large scale determination of oxidized lipids using high res MS and MS/MS	67
<i>Janine Wiebach, Manuela Nagel, Thomas Altmann, Andreas Börner, David Riewe</i>	
06-05: Effect of volatile organic compounds and taste-related primary metabolites on sensory perception of tomato cultivars in an organic low-input system	68
<i>Cut Erika, Marcel Naumann, Bernd Horneburg, Inga Smit, Detlef Ulrich, Elke Pawelzik</i>	
06-06 Vast amount of metabolites determined by UPLC-MS from Scots pine roots associated bioactive endophytic fungi	70
<i>Jenni Tienaho, Maarit Karonen, Ville Santala, Matti Karp, Robert Franzen, Tytti Sarjala</i>	

Session 7 - NMR Spectroscopy / MS imaging (Co-chairs: Deborde/Schneider)

07-01: NMR in plant science –methods and selected examples.....	71
<i>Bernd Schneider</i>	
07-02: An overview of NMR applications in metabolite profiling of small molecules for plant metabolism studies	72
<i>Catherine Deborde, Daniel Jacob, Jean-Xavier Fontaine, Roland Molinié, Léa Roch, Anaïs Clavé, Yves Gibon, Marguerite Batsale, François Mesnard, Annick Moing</i>	
07-03: From <i>Arnica montana</i> to <i>Taraxacum koksaghyz</i> NMR-based metabolite profiling supporting breeders	74
<i>Roland Geyer, Christoph Dotzer, Michael Rettig, Steffen Heelmann, Andreas Krumpel, Renate Kirchhöfer, Fritz Huber</i>	
07-04: Mass spectrometry imaging in chemical ecology	76
<i>Aleš Svatoš, Filip Kaftan, Benjamin Bartels, Purva Kulkarni</i>	

Poster Session

P-001: Chemical diversity of 14 wild grown <i>Zataria multiflora</i> populations from Iran determined by NIR and GC-MS	77
<i>Ali Karimi, Andrea Krähmer, Nadine Herwig, Hartwig Schulz, Javad Hadian, Torsten Meiners</i>	
P-002: NIRS prediction of the ethanol content in various rose oil samples from Bulgaria.....	78
<i>Kamelia Getsovska, Gennadi Gudi, Vera Deneva, Daniela Antonova, Andrea Krähmer, Liudmil Antonov, Hartwig Schulz</i>	
P-003: Development of an NIR method for the determination of essential oil in fresh sage leaves	80
<i>Gennadi Gudi, Hartwig Schulz, Andrea Krähmer</i>	
P-004: Step-by-step filter: quantitative characterization of <i>Arnicae flos</i> by NIR spectroscopy	82
<i>Daniela Ivanova, Vera Deneva, Dimitrina Zheleva-Dimitrova, Vesela Balabanova-Bozushka, Daniela Nedeltcheva-Antonova, Reneta Gevrenova, Liudmil Antonov</i>	
P-005: Genetic mapping of wine quality traits in grapevine	83
<i>Florian Schwander, Franco Röckel, Reinhard Töpfer</i>	
P-006: NIRS based quantification of polyphenols in <i>Actaea racemosa</i> (L.) rhizome	84
<i>Marian Bittner, Andrea Krähmer and Matthias F. Melzig</i>	
P-007: Measuring absorption and reduced scattering coefficients of fresh fruit by means of laser-induced backscattering imaging	85
<i>Manuela Zude-Sasse, Christian Regen, Andrew East, Li Mo</i>	
P-008: Sensor application in grapevine breeding	86
<i>Anna Kicherer, Katja Herzog, Reinhard Töpfer</i>	
P-009: Application of infrared spectroscopic approaches for describing and reducing pyrrolizidine alkaloid contamination in plant material.....	87
<i>Andrea Krähmer, Claudia Beleites, Phillip Lottes, Cyrill Stachniss and Hartwig Schulz</i>	
P-010: Genotyping of winter oilseed rape with sensor systems under field conditions	88
<i>Jorita Krieger, Heike Gerighausen, Holger Lilienthal</i>	
P-011: Is death the beginning of a long life? Tracking extractives on their way to heartwood	89
<i>Martin Felhofer, Batirtze Prats-Mate, Notburga Gierlinger</i>	

P-012: From the soft to the hard walnut shell: Changes in microchemistry revealed by Confocal Raman Microscopy	90
<i>Nannan Xiao, Peter Bock, Notburga Gierlinger</i>	
P-013: HISTOCHEM: a database of reference spectra for plant cell wall polymers.....	91
<i>Sylvie Durand, Patrice Papineau, Paul Robert, Marie-Françoise Devaux, Fabienne Guillou</i>	
P-014: Molecular structure and vibrational spectra of 5-nitouracil: A comparision with uracil	93
<i>Alcolea M. Palafox, Vinod K. Rastogi, Manoj Kumar, Surendra Pratap Singh</i>	
P-015 FTIR characterization of isolated fruit cuticles from tomato species	96
<i>Ana González Moreno, Patricia Segado, Ana I. Quílez, Eva Domínguez, Antonio Heredia</i>	
P-016: Molecular structure and vibrational spectra of 2-thiouracil: A comparison with uracil	98
<i>Alcolea M. Palafox, Manoj Kumar, Sunila Abraham, Vinod K. Rastogi</i>	
P-017: Spatiotemporal chemical cartography of plant cell wall dynamics during growth and after gravitropic stress.....	101
<i>Anne-Sophie Blervacq, Isabelle de Waele, Myriam Moreau, Ludovic Duponchel, Simon Hawkins</i>	
P-018: Resin composition of tapped black pine (<i>Pinus nigra</i> var. <i>austriaca</i>) recorded by FT-IR	103
<i>Barbara Hinterstoisser, Ena Smidt, Thomas Ters, Johannes Tintner</i>	
P-019: Herbal characterization and discrimination perspectives using Fourier transform infrared photoacoustic spectroscopy (FTIR PAS) and diffuse reflectance infrared spectroscopy (DRIFT)	104
<i>Agnese Brangule, Péteris Tretjakovs</i>	
P-020: Sensor technology for gap detection – technical measurements of infrared sensors	106
<i>Verena Overbeck, Tanja Pelzer, Jens Karl Wegener</i>	
P-021: Plasticity of wheat (<i>Triticum aestivum</i> L.) storage proteins: quality versus quantity....	107
<i>Azin Rekowski, Monika A. Wimmer, Christian Zörb, Günter Henkelmann</i>	
P-022: Cold storage impact on the metabolome of open-pollinated onion varieties.....	108
<i>Maria Luisa Romo, Christoph Weinert, Björn Egert, Matthias Frechen, Bernhard Trierweiler, Marina Häußler, Sabine E. Kulling, Christian Zörb</i>	
P-023: Effect of postharvest handling on flavor-related quality attributes of tomato fruits ..	109
<i>Larissa Kanski, Marcel Naumann, Elke Pawelzik</i>	
P-024: Untargeted multiplatform metabolomics assay for the analysis of plant-herbivore interactions in broad bean	111
<i>Mariusz Kowalczyk, Justyna Krzyżanowska-Kowalczyk</i>	
P-025: High resolution mass spectrometry characterization of crocins in saffron, followed by their preparative HPLC isolation and anticancer assay	112
<i>Alireza Haratian, Hassan Rezadoost, Alireza Madjid Ansari, Mohammad Amin Javidi, Alireza Ghassempour</i>	
P-026: UHPLC-HRMS profiling of <i>Clinopodium vulgare</i> extract.....	113
<i>Gazela Nasar-Eddin, Dimitrina Zheleva-Dimitrova, Reneta Gevrenova, Vessela Balabanova, Rumiana Simeonova, Nikolay Danchev</i>	

P-027: Process Analytical Technology (PAT) for Quality by Design focused process development and water based extraction techniques for the isolation of valuable components from naturally variable raw material	114
<i>Lukas Uhlenbrock, Jochen Strube</i>	
P-028: Phenolic profiles of <i>Acer pseudoplatanus</i> as affected by plant developmental stage in the light of equine atypical myopathy	115
<i>Franziska Scharmann, Diana Bunzel, Sabine E. Kulling, Sabine Abolting</i>	
P-029: Basil cultivation without sunlight.....	116
<i>Jenny M. Tabbert, David Riewe, Christoph von Studzinski, Inga Mewis, Oliver Arnold, Hartwig Schulz</i>	
P-030: Metabolite profiling of winter wheat grains from Fusarium head blight infected plants.....	117
<i>Leslie Tais, Christoph Böttcher, Hartwig Schulz</i>	
P-031: Detection of ergot alkaloids in flour and pastries.....	118
<i>Christine Schwake-Anduschus, Elisabeth Sciurba, Jens Begemann, Anja Bonte</i>	
P-032: Development of a LC-qToF-MS based approach to verify the geographical origin of native olive oils	120
<i>Ina Willenberg, Alessandra Parma, Anja Bonte, Bertrand Matthäus</i>	
P-033: Secondary metabolites in seed development of <i>Musella lasiocarpa</i>	121
<i>Hui Lyu, Shu Xu, Yu Chen, Christian Paetz</i>	
P-034: Antioxidants in tomatoes are influenced by potassium fertilization	122
<i>Frederike Sonntag, Diana Bunzel, Elke Pawelzik, Inga Smit, Marcel Naumann</i>	
P-035: Compounds of sundew (<i>Drosera rotundifolia</i>) as a source for high value products from Finnish peatlands	124

P-019: Herbal characterization and discrimination perspectives using Fourier transform infrared photoacoustic spectroscopy (FTIR PAS) and diffuse reflectance infrared spectroscopy (DRIFT)

Agnese Brangule, Pēteris Tretjakovs

Riga Stradiņš University, Department of Human Physiology and Biochemistry, Riga, Latvia
E-mail: agnese.brangule@rsu.lv

This study demonstrates the significant potential of cantilever-enhanced Fourier transform infrared photoacoustic spectroscopy (FTIR PAS) principles and diffuse reflective infrared spectroscopy (DRIFT) with a diamond stick. The improved sensitivity and reproducibility of both methods present an absolute tool in the study of herbals and plants.

Figure 1. FTIR PAS and FTIR DRIFT spectra of green tea and chamomile

For many centuries, herbal medicine (HMs) has been used worldwide in traditional health care [1]. FTIR methods have been widely used since the 1960s [2] and can be used for both qualitative and quantitative analysis [3]. In the field of HMs, the FTIR fingerprint spectra have been used since early 1987 and are used less frequently than chromatography methods (CM) [4,5,6]. Until now, the introduction of FTIR methods was limited by the complexity of spectra and its interpretation. This problem can be resolved by using chemometrics and machine learning. The major advantages of FTIR methods are the following: it is sensitive and non-destructive or only slightly damages the sample; it requires minimal sample preparation at most; small sample quantities are necessary for measuring [2,3]. One of the important features of FTIR is the possibility to simultaneously determine different components in the same sample from a single instrumental measurement [7]. In previous studies, the FTIR spectroscopy's sampling methods transmission and ATR was most widely used as DRIFT and cantilever-enhanced photoacoustic spectroscopy (FTIR PAS). FTIR PAS is based on the photoacoustic effect. If the substance is irradiated with a pulsating light, the substance emits acoustic waves that have the same frequency as the pulsating light.

In this study, we evaluated dried herbals and green, and black tea (Figure 1). PAS and DRIFT spectra were taken at 450–4000 cm⁻¹, at a resolution of 4 cm⁻¹, and an average made from 10 scans. For PAS, the homogenized samples were placed in the PAS cell filled with helium gas (flow 0.5 l/min), but for DRIFT homogenized samples were placed on the diamond stick.

Comparison between spectra recorded by PAS and DRIFT showed high sensitivity and good resolution. The results obtained provide information about the spectral behavior of homogenized herbal and tea powder can be a useful for establishing identification and discrimination criteria. It has been demonstrated that PAS and DRIFT can be useful experimental tool for the characterization and discrimination of herbals.
