REHABILITATION DAYS
November 11-12, 2010

3rd INTERNATIONAL INTERDISCIPLINARY SCIENTIFIC CONFERENCE
SOCIETY. HEALTH. WELFARE

1st CONGRESS OF REHABILITATION DOCTORS OF LATVIA

PROGRAMME

Informative supporter

Faculty of Rehabilitation

"From the perspective of rehabilitation, the type of illness or ailment is not the most important. The most important thing is to give people the opportunity through various means to participate in social life and work."

Aivars Vetra

professor, Dean of the Faculty of Rehabilitation

Today one of the most dynamic fields of treatment is the rehabilitation of people, who through a combination of illness and age or through other circumstances have developed serious health problems. This is also shown by the extensive choice of study programmes offered by the RSU Faculty of Rehabilitation. In 1993, the first study programme in Physiotherapy was developed at the University, but at present the Faculty of Rehabilitation offers the widest opportunities in Latvia for emerging specialists, who will care for the maintenance, restoration and improvement of people's health. There are rehabilitation teams at all of the largest Latvian treatment institutions.

At the RSU Faculty of Rehabilitation one can study Bachelor and Professional study programmes not just in **Physiotherapy**, but also in **Occupational Therapy, Audiology-Speech Therapy, Orthotics – Prosthetics, Social Work, Nutrition and Fitness**.

Graduates of study programmes "Audiology-Speech Therapy", "Physiotherapy", "Art Therapy", "Social Work" and "Nutrition" can also continue their studies in the master's and doctoral level.

November 11
